

ROHIT ANANTHAN

Data Scientist & AI Engineer — Production ML · GenAI & Agentic Systems · Experimentation

+1 (202) 989-9596 · rohitananthan123@gmail.com · rohitananthan.info · linkedin.com/in/rohit-ananthan · github.com/Ramidoz

SUMMARY

Data scientist with 4+ years building production ML and agentic AI systems across healthcare, e-commerce, non-profit, and enterprise domains. Owns the full lifecycle — problem framing, experimentation and causal measurement, model development, deployment, and MLOps — with deep experience in LLM/RAG applications, real-time anomaly detection, and the SQL/Python pipelines and dashboards that turn one-off analyses into durable, self-serve systems.

EXPERIENCE

AI Engineer — Vdart Inc.

Remote | Jun 2026 – Present

- Building a multi-agent system that automates the full RFP lifecycle for an enterprise healthcare client — intake, routing and assignment, QA review, and rules-based scoring against current evaluation criteria — converting a recurring manual workflow into a repeatable system targeting ~85% less manual processing time.
- Engineered retrieval over an Azure AI Search vector index with MongoDB persistence to ground scoring in the latest rules; accelerated delivery across a React/Node.js stack using GitHub Copilot—orchestrated coding agents.

Data Scientist — Invision Global Tech Inc.

Remote | Feb 2026 – Jun 2026

- Built evaluation harnesses for production LLM workflows, including reusable prompt patterns and tool-calling templates that compressed turnaround on recurring engineering work.
- Prototyped ML and analytics solutions for client engagements using Python, FastAPI, SQL, and AI-assisted development.

Data Scientist — Community Dreams Foundation

Remote | Feb 2025 – Feb 2026

- Built and deployed a production voice FAQ agent (Gemini Pro, LangChain, LlamaIndex) with a defined evaluation framework — answer accuracy, task completion, deflection rate, and latency — so every pipeline change was judged against a fixed test set instead of subjective review.
- Ran controlled evaluation cycles comparing RAG and model-pipeline iterations, improving answer accuracy ~22%; selected winning configurations on guardrails (latency, task completion, failure behavior) rather than raw accuracy alone.
- Designed and shipped scalable ML pipelines on GCP Vertex AI with Dataflow, Airflow, and BigQuery, cutting latency on recurring data flows by 60% and standing up MLOps monitoring so stakeholders could act on recurring reads with confidence.

Data Scientist — Kameleon Technologies

Chennai, India | May 2021 – Jul 2023

- Built a real-time fraud detection system combining Neo4j graph analytics with XGBoost ensemble models, processing 5M+ daily transactions and reducing false positives by 18%.
- Designed and analyzed A/B tests on campaign and product-experience rollouts, defining primary metrics alongside guardrail metrics; experimentation and difference-in-differences cohort analysis contributed to 12–15% gains in engagement and reactivation.
- Shipped customer segmentation (K-means, RFM) and churn models in Python that targeted retention and lifecycle campaigns, improving 90-day retention by ~12–15%.
- Owned ETL pipelines and analytics infrastructure (PySpark, AWS) processing 5M+ daily transactions, replacing manual reporting as the source of truth across product, revenue, and fraud workflows.

SKILLS

- **ML & GenAI:** Python, scikit-learn, XGBoost, RAG, LLM evaluation, LangChain, LlamaIndex, multi-agent systems, MLflow, prompt engineering
- **Experimentation & Causal Measurement:** A/B test design, primary/guardrail metric frameworks, difference-in-differences cohort analysis, incrementality measurement, statistical analysis
- **Data Engineering & Cloud:** SQL, PySpark, Airflow, dbt, BigQuery, Vertex AI, Dataflow, Snowflake, MongoDB, Neo4j, Azure AI Search, FastAPI, AWS
- **Tooling & Certifications:** GitHub Copilot, Claude Code, Cursor, Tableau · AWS Certified AI Practitioner · Neo4j Graph Data Science Certification

EDUCATION

- **MS, Information Systems** — University of Maryland, Robert H. Smith School of Business | Aug 2023 – Dec 2024
- **BTech, Engineering** — Indian Institute of Information Technology | 2018 – 2022 | ML paper at ICRAM 2022, IIT Jodhpur (Springer)
